

	<h1 style="text-align: center; color: blue;">QHSE Policy</h1>	IMS-002	
		Issue	03
		Date: 17-7-2018	

We are committed to ensure satisfaction of our customers and all interested parties by providing them the best value in products and services to become the leading brand in Energy Metering. We recognize that Integrated Management System (IMS) and community responsibilities are an integral part of our operations. We shall achieve the satisfaction of our stake holders and valuable customers by:

- Providing a frame work for establishing and reviewing IMS objectives and targets to ensure continual improvement.
- Monitoring, evaluating and continually improving our IMS performance and its effectiveness through the definition of operational standards/procedures, trainings, assessments and audits.
- Continually enhancing awareness, yielding higher skill and system efficiency for improved products and services while reducing risks by adapting the IMS.
- Participating in product and process improvement initiatives, risk assessment, pollution prevention and elimination of potential non-conformities related to IMS to enhance the customer satisfaction level.
- Co-operating with government and other legislative bodies & regulatory authorities to comply with the requirements related to QHS & E.
- Ensuring that, our suppliers and sub-contractors are compatible with our own commitment to QHS & E.
- Recognizing that implementation of IMS is everyone's direct responsibility.
- Making top management, managers, incharges and supervisors accountable for effectiveness of IMS towards elimination of cause that might lead to effect the IMS performance.
- Developing an effective IMS to reduce waste, eliminate hazards, environmental impact mitigation, prevent incident / accident, ill health, pollution& conserve all natural resources.
- Ensure that the QHS& E Policy is understood, available publicly and communicated to all internal & external interested parties.
